Headquartered in Charlotte, North Carolina, StreamLogic Inc. is a Microsoft Certified information technology consulting firm specializing in business process automation & reengineering, technology integration and optimization, custom software development, and workplace collaboration solutions. With more than 10 years of technology and business related experience, we use the principles of organizational efficiency to improve your organization's business processes, increase productivity, and reduce costs.

Founder and President:

Curtis C. Hughes

<http://www.linkedin.com/in/curtishughes>

Core Competencies:

Business Process Automation (BPA) / Business Process Reengineering (BPR) – Analyzing the people and processes within a company to understand where cumbersome and non-essential activities can be automated or removed, thus reducing costs and the potential for human error, while increasing service delivery and overall customer satisfaction.

Technology Integration and Optimization - Using customized technology strategies to integrate disparate systems within an organization, allowing various business processes to communicate more effectively. This is most often utilized to reduce manual data entry and human errors, and streamline operations.

Software Architecture, Development and Customization – Designing and developing custom software applications that support business processes and help organizations perform better and with greater efficiency. This includes design and development from scratch, or modifying existing applications to better support the business needs.

Workplace Collaboration Solutions –Architecting and implementing collaboration solutions based on Microsoft® SharePoint® technologies that support and enhance business processes. These collaboration solutions aid in connecting remote locations within a global business environment, while increasing data and knowledge sharing within an organization. Typically, document management / content management is also part of these solutions, which helps move documents and information from a users' desktops and shared drives to a central repository where the entire organization can find, use, and share real-time data and documents.

Experience:

Curtis Hughes is Founder and President of StreamLogic Inc, a Microsoft Certified information technology consulting firm specializing in business process automation, technology integration, custom software development, and workplace collaboration solutions. StreamLogic helps organizations align technology with their business goals, developing complete solutions to help them run better, prosper and grow.

Prior to founding StreamLogic, Curtis was the Director of NetOvation, LLC, in Charlotte, North Carolina. During his tenure, Curtis was responsible for managing the company's information technology planning as well as operations involving system architecture, software design, development and implementation, legacy integration, e-commerce, and private hosting solutions.

Before his appointment as Director at NetOvation, Curtis was the Senior Information Architect for Theodor Wille Intertrade, GmbH (TWI), a U.S. Military prime vendor headquartered in Zug, Switzerland. While at TWI, Curtis was the driving force behind developing the company's first web-based transactional and procurement tools, which have been widely embraced, and heavily relied on by the U.S. Department of Defense in Europe and the Middle East. He was also responsible for initiating the architecture and implementation of numerous components, processes, and procedures that have given TWI's clients and employees a more streamlined and efficient way to manage day-to-day processes.

With over a decade of related technology and business experience in North America, Europe and Asia, Curtis has had the opportunity to implement solutions and strategies that have advanced many businesses into the 21st century, including but not limited to:

- American Red Cross
- BAE Systems, Inc.
- BlueLinx Corporation
- Bovis Lend Lease
- The Coca-Cola Bottling Company
- Dollar General Stores
- Georgia-Pacific Corporation
- Harris Teeter Inc.
- Lowe's Home Improvement (LF, LLC.)
- R.L. Polk & Co.
- The Sara Lee Corporation
- Syngenta Corporation
- Theodore Wille Intertrade, GmbH (TWI)
- United Parcel Service of America, Inc. (UPS)

We are also very proud to have experience working directly with several U.S. Government agencies and systems, specifically:

- [Defense Logistics Agency \(DLA\)](#)
- [Defense Supply Center Philadelphia \(DSCP\)](#)
- [Defense Supply Center Philadelphia - Europe \(DSCPE\)](#)
- [Defense Finance and Accounting Service \(DFAS\)](#)
- [Defense Finance and Accounting Service Web Invoice System \(WInS\)](#)
- [MRO Prime Vendor program](#)

StreamLogic is also registered with the U.S. Government's [Central Contractor Registration \(CCR\)](#).

- DUNS #: 783195386
- CAGE Code: 4GMR3

- Microsoft SharePoint Users Group

Our Philosophy:

We understand that every organization is unique. That's why we make it our first priority to understand your company's business goals, and develop custom solutions to assist you in achieving them.

By combining years of technical experience with the basic principles of organizational efficiency, StreamLogic takes a one-of-a-kind approach to technology consulting. Instead of applying an off-the-shelf solution that may hinder operational processes, we use our Ownership Approach™ to ensure that every solution we recommend is tailored 100% to *your* needs.

Our Ownership Approach™ takes its name from the feelings of pride and responsibility that any owner has for what they own. We feel this same sense of duty with every project we undertake. By helping you select and implement solutions that enhance your existing systems, improve your business processes and avoid costly inefficiencies in the future, we offer technology consulting services that are custom designed with your business needs in mind.

Our Mission:

At StreamLogic Inc., we make it our first priority to understand how our clients define success within their organization. We understand that each client defines this differently, which is why we develop targeted technology strategies, guided by the principles of organizational efficiency, to maximize this success. We have only one purpose, to maximize the success of our clients. We will always measure our success by the success of our clients.

Our Guarantee:

In today's fast-paced environment, some consultants forget that our business is all about your business. At StreamLogic, we measure our success by the success of our clients, ensuring that your needs are always top-of-mind.

Because we believe so strongly in our ability to provide targeted technology solutions that will help you achieve your business objectives, we offer The StreamLogic Guarantee™. If you aren't completely satisfied by the products or services provided by StreamLogic, we will do anything within reason to make it right, or refund to you a portion the project fees.

It's very simple to us: If we don't stand behind our work, why should you?

Endorsements:

"Curtis is a person with a vision/concept in mind and who can convince others to move towards this vision/concept. He is a very dedicated person and if he believes in something, he can put a lot of effort and time into its realization. He is also very detail oriented and thinks through. He works well with the business users and managed successfully the big task to upgrade our internal business application and its deployment including on-site training in Europe and the Middle East. During this time he managed two external consultants effectively. Last but not least: His positive vibes are especially helpful in such stressful times; highly recommended."

- *Hannes Roskopf, Chief Information Officer, Theodor Wille Intertrade, GmbH (TWI)*

"Thanks for taking charge of the development for our new Project Management system on SharePoint®. Your contribution will revolutionize the way our company operates and save us countless hours. Further, I truly appreciated your professionalism; in particular, your proactive, process-oriented approach to solving our problems, and your extremely detailed documentation. Do you know that this is the only time I've ever gotten documentation from an IT professional? I love it. What a difference to finish an IT project and actually KNOW what happened and how to use it! You have my highest recommendation, personal thanks, and wishes for continued success."

- *David Worrell, CFO, Board Member, AmeriStart/Pharma Services Network, Inc.*

"Curtis is enthusiastic about his work and the possibilities for creating solutions for our business problems and inefficiencies. He is focused on understanding the details and is able to quickly grasp processes enabling him to create potential and creative solutions for the Greater Carolinas Red Cross. At key junctures in the process, he provided possibilities, when the team might have concluded instead, that it was a dead end. He is organized and motivated, and I would refer him to businesses needing IT consultation and solutions so that they may streamline their processes and focus on growing the organization!"

- *Elaine Spallone, Marketing & Communications Manager, American Red Cross*

"It's been great working with Curtis and his team. Curtis is one of those rare individuals who can look, interpret and completely digest technologies and give back practical business relevance to implementing or not implementing them. He sees technology for the benefit of an organization as a means to streamline, cut costs and make every day life easier. It's hard to find technology oriented people who are like that. I am always looking to him to help me make sense of new software, hardware and other services for my own business."

- *Marc Pitre, Founder and CEO, New Way Media*

"I knew that we needed an extremely strong business process innovator on our team. Curtis and StreamLogic had been recommended to me from a mutual client. After meeting with Curtis and learning about his talents and areas of expertise, I knew that our committee could not move forward until Curtis was on board. He has immediately embraced the spirit of involvement with our committee and the underlying need of evolving the business processes at the Greater Carolinas Red Cross. Curtis has quickly identified where the internal data communications flaws are, as well as where our opportunities for improvement lie. He is a true asset to our committee and I know as we progress through the project that the greater community will benefit from the new technologies that we introduce."

- *Jay Joyce, Managing Partner, Ideas Squared*

"Professionalism defines Curtis. His technical abilities, project planning and management skills are surpassed only by his drive and motivation to complete projects on time and within budget. I highly recommend Curtis and look forward to working with him in the future."

- *Dennis Cary, Group IT Manager, Dynacast, Inc.*
